MEMORANDUM FOR SEE DISTRIBUTION

**SUBJECT: 3d Corps Support Command (3D COSCOM) Policy Memorandum # 27,
Reconciliation of Property Book Data with the Automated Materiel Status System (AMSS)**

1. **PURPOSE.** To establish the 3D COSCOM policy for the reconciliation of property book data with the AMSS reporting system.
2. **APPLICABILITY.** Commanders in all 3D COSCOM units.
3. **BACKGROUND.** Since 1996, all 3D COSCOM units have accounted for their maintenance time using the User Level Logistics System-Ground (ULLS-G) system in the motor pools. This system requires the manual entry of authorization and on hand data as well as other system related data. History has demonstrated that the accuracy of the ULLS-G data does not match the unit hand receipt.
4. **POLICY.** Part of the change of command inventory for each incoming company commander will include the reconciliation of the data on the unit MTOE hand receipt with the data in the ULLS-G system as shown on the AMSS Authorization Report. The end state is that the units MTOE and AMSS Authorization Report match. The Support Operations Officers of the group supporting that unit will verify that the reconciliation of data has taken place and group commanders will know the results prior to approving the change of command. The Group commander will forward the results to the 19th SC and the 3D COSCOM G4 on an annual basis.
5. **SUPERSESSION.** None.
6. **EXPIRATION.** This policy memorandum remains in effect until rescinded.
7. "Sustaining the Line!"
